#### **Session Program**

2-6 Aug 2021

## A Virtual Tribute to Quark Confinement and the Hadron Spectrum 2021

# **Parallels Track F**

online

### Monday 2 August

17:00-17:20	
Deuteron ch	arge and quadrupole form factors in chiral effective field theory
Speaker	
Arseniy Filin	
17.20 17.40	
17:20-17:40	
Nuclear Dhu	size Multi measure Constraints on the Equation of State of Neutro
Nuclear-Phy	sics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars	sics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars Speaker	sics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars Speaker Ingo Tews	sics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars Speaker Ingo Tews	rsics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars Speaker Ingo Tews 17:40-18:00	rsics Multi-messenger Constraints on the Equation of State of Neut
Nuclear-Phy Stars Speaker Ingo Tews	rsics Multi-messenger Constraints on the E
-	sics Multi-messenger Constraints on the Equation of State of Neutronsics Multi-messenger Constraints on the Equation of State of Neutronsite and the State of Neutron star mergers slope of the nuclear symmetry energy with neutron star mergers
Nuclear-Phy Stars Speaker Ingo Tews 17:40-18:00 Probing the Speaker	slope of the nuclear symmetry energy with neutron star mergers

#### **Tuesday 3 August**

#### Wednesday 4 August

#### **Thursday 5 August**

4

### Friday 6 August

14:30-14:50 Crystalline phases in dense matter Speaker Stefano Carignano 14:50-15:10 Thermodynamics, quark and pion condensates in finite isospin chiral perturbatheory Speaker Prof. Jens Oluf Andersen 15:10-15:30 Holographic quarkyonic matter Speaker Nicolas Kovensky Parallels Track F: Parallel VII ression Location: online 15:40-16:00 Warm dense QCD matter in strong magnetic fields Speaker Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	Session   Loca	ition: online
Speaker Stefano Carignano 14:50-15:10 Thermodynamics, quark and pion condensates in finite isospin chiral perturbative theory Speaker Prof. Jens Oluf Andersen 15:10-15:30 Holographic quarkyonic matter Speaker Nicolas Kovensky Parallels Track F: Parallel VII tession   Location: online 15:40-16:00 Warm dense QCD matter in strong magnetic fields Speaker Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	14:30-14:50	Crystalline phases in dense matter
14:50-15:10         Thermodynamics, quark and pion condensates in finite isospin chiral perturbative of theory         Speaker         Prof. Jens Oluf Andersen         15:10-15:30       Holographic quarkyonic matter         Speaker         Nicolas Kovensky         Parallels Track F: Parallel VII         ression       Location: online         15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron natter         Speaker	<b>Speaker</b> Stefano Carigna	ano
Thermodynamics, quark and pion condensates in finite isospin chiral perturbativeory Speaker Prof. Jens Oluf Andersen  15:10-15:30 Holographic quarkyonic matter Speaker Nicolas Kovensky  Parallels Track F: Parallel VII ression   Location: online  15:40-16:00 Warm dense QCD matter in strong magnetic fields Speaker Helena Kolesova  16:00-16:20 Relativistic density functional approach to unified description of quark-hadron natter Speaker	14:50-15:10	
Speaker         Prof. Jens Oluf Andersen         15:10-15:30       Holographic quarkyonic matter         Speaker         Nicolas Kovensky         Parallels Track F: Parallel VII         ression       Location: online         15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron natter         Speaker	Thermodyna theory	amics, quark and pion condensates in finite isospin chiral perturba
Prof. Jens Oluf Andersen          15:10-15:30       Holographic quarkyonic matter         Speaker       Nicolas Kovensky         Parallels Track F: Parallel VII         ression       Location: online         15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron matter         Speaker	Speaker	
15:10-15:30       Holographic quarkyonic matter         Speaker       Nicolas Kovensky         Parallels Track F: Parallel VII         ression       Location: online         15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron natter         Speaker	Prof. Jens Oluf A	Andersen
Speaker Nicolas Kovensky Parallels Track F: Parallel VII ession   Location: online 15:40-16:00 Warm dense QCD matter in strong magnetic fields Speaker Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	15:10-15:30	Holographic quarkyonic matter
Nicolas Kovensky         Parallels Track F: Parallel VII         dession   Location: online         15:40-16:00         Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron natter         Speaker	Speaker	
Parallels Track F: Parallel VII Dession Location: online 15:40-16:00 Warm dense QCD matter in strong magnetic fields Speaker Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron natter Speaker		
15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker         Helena Kolesova         16:00-16:20         Relativistic density functional approach to unified description of quark-hadron natter         Speaker	Nicolas Kovens	ky
15:40-16:00       Warm dense QCD matter in strong magnetic fields         Speaker       Helena Kolesova         16:00-16:20       Relativistic density functional approach to unified description of quark-hadron natter         Speaker       Speaker	Nicolas Kovens Parallels T	rack F: Parallel VII
Speaker Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	Nicolas Kovens Parallels T Session   Loca	rack F: Parallel VII Track F: Parallel VII Ition: online
Helena Kolesova 16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	Nicolas Kovens Parallels T Session   Loca 15:40-16:00	rack F: Parallel VII htion: online Warm dense QCD matter in strong magnetic fields
16:00-16:20 Relativistic density functional approach to unified description of quark-hadron matter Speaker	Nicolas Kovens Parallels T Session   Loca 15:40-16:00 Speaker	rack F: Parallel VII ntion: online Warm dense QCD matter in strong magnetic fields
Relativistic density functional approach to unified description of quark-hadron matter Speaker	Nicolas Kovens Parallels T Session   Loca 15:40-16:00 Speaker Helena Kolesov	rack F: Parallel VII ntion: online Warm dense QCD matter in strong magnetic fields
matter Speaker	Nicolas Kovens Parallels T Session   Loca 15:40-16:00 Speaker Helena Kolesov 16:00-16:20	rack F: Parallel VII htion: online Warm dense QCD matter in strong magnetic fields
Speaker	Nicolas Kovens Parallels T Session   Loca 15:40-16:00 Speaker Helena Kolesov 16:00-16:20 Relativistic	rack F: Parallel VII Intion: online Warm dense QCD matter in strong magnetic fields a density functional approach to unified description of quark-hadron
	Nicolas Kovens Parallels T Session   Loca 15:40-16:00 Speaker Helena Kolesov 16:00-16:20 Relativistic matter	rack F: Parallel VII htion: online Warm dense QCD matter in strong magnetic fields a density functional approach to unified description of quark-hadron
